NITHEESH VELLAIYAN

mail-nitheesh.codes@gmail.com 9500911807 nitheeshcodes.netlify.app

SUMMARY

Results-driven Software Developer with strong expertise in full-stack web development, UI/UX engineering, and scalable application design. Skilled in building responsive and interactive applications using React.js, Tailwind CSS, and RESTful APIs, with practical experience across the MERN stack (MongoDB, Express.js, React.js, Node.js). Adept at translating business needs into intuitive user interfaces and robust backend solutions. Known for writing clean, maintainable code, optimizing performance, and collaborating effectively in cross-functional teams. Committed to continuous learning and delivering reliable, high-quality digital products.

EDUCATION

BACHELOR OF ENGINEERING-ECE
Sree Sakthi Engineering College Coimbatore 2026 CGPA-7.8% (up to 7th semester)
SCHOOL Govt Higher secondary school
Namakkal 06/2020-05/2022

SKILLS

Programming & Software: Python, Tkinter, OpenCV, MediaPipe, PyAutoGUI, Prompt Engineering
Web Development:
Frontend: HTML, CSS, React.js, Tailwind CSS, Responsive UI
Backend: Node.js, Express.js, MongoDB, REST API Design
Tools & Deployment: Firebase, Netlify, Git, GitHub
UI/UX Design: Figma, Prototyping, Wireframing, UX Research, User-Centered Designcha
Soft Skills: Critical Thinking, Problem Solving, Team Collaboration, Communication, Leadership

PROJECT

LocalBiz

github.com/Nitheeshnkl/LocalBiz

Engineered a location-based business directory utilizing Next.js, TypeScript, TailwindCSS, and ShadCN UI to enable students to easily discover nearby restaurants, shops, and services through interactive mapping, category filters, and up-to-date business listings.

Marketing Analytics Dashboard

github.com/Nitheeshnkl/Marketing-analytics-dashboard-

Marketing Analytics Dashboard is a comprehensive, full-stack web application designed to help marketing teams and business executives monitor, analyze, and optimize their marketing performance in real-time. The platform provides actionable insights through intuitive visualizations, detailed analytics, and performance metrics tracking.

FIRE Detection via Only Software

github.com/Nitheeshnkl/Fire-detection-using-image-processing

This project implements a real-time fire detection system using image processing techniques with OpenCV and Python. It analyzes camera input or image frames to detect fire and triggers appropriate responses via a GUL Optional HTTP integration is included for alerting external systems.

CERTIFICATIONS

- ICT academy-INFOSYS
- UI/UX DEVELOPING
- BASICS NPTEL CLOUD COMPUTING
- GEEKS FOR GEEKS
- GEN AI AND CHATGPT
